**Note that the numbers refer to the poster number, not the page number.**

**Access**
- A Need for Oral Health Care in a Rural Community .......... 20
- A Novel Approach to Scheduling New Patients in a General Practice Residency ........................................ 110
- Children’s Oral Health: Application of a Needs Assessment in a Rural and a Native American Community .......... 31
- Determining Access to Care Barriers at a Local Community Center ................................................................. 151
- Early Childhood Caries Needs Assessment: Focus on Native Americans .......................................................... 22
- Free Oral Health Care for Disadvantaged Children .......... 128
- Improving Older Adults’ Access to Dental Care in a University-Based Dental Clinic: Interdisciplinary Collaboration with Social Work Professionals ........ 96
- Providing Care for Underserved Patients: The Role of Dental Education .............................................................. 12
- Services for Special Needs Persons by African American Dentists in Tennessee .................................................. 14

**Admissions**
- Faculty Attitudes Toward Accommodating Students with Disabilities ................................................................. 135
- DAT Test Preparation for Students from Disadvantaged Backgrounds: A Ten-Year Analysis ............................. 129
- Characteristics, Role, and Responsibilities of Principal Admissions Officers at U.S. Public and Private Dental Schools ................................................................. 78
- Dental Hygiene Admissions Criteria: A Predictor of Success? ........................................................................ 51
- Predental Enrichment Activities of U.S. Colleges and Universities ........................................................................ 12

**Accommodation**
- Programs for Foreign-Trained Dentists in U.S. Dental Schools with a Focus on IDP-UCSF .................................................... 3

**Advanced Standing**
- Access to Post-Diploma Degree Completion Education for Dental Hygienists ......................................................... WIP29
- Assessment of Dental Hygienists Certified to Administer Local Infiltration/Nitrous Oxide ........................................... 125
- Clinical Collaboration of Dental and Dental Hygiene Students ................................................................................ WIP10
- Dental Hygiene Admissions Criteria: A Predictor of Success? ........................................................................ 51
- Dental Hygiene Student Experience with Ethically Problematic Situations .......................................................... 104
- Dental Hygiene Students Informed of the Profession Before Starting the Program .................................................. 30
- Dental Hygiene Students’ Preferences for Using Blackboard .................................................................................. 29
- Developing Calibration Workshops for Periodontal and Dental Hygiene Faculty .................................................. WIP12
- Development and Evaluation of a Pediatric Course for Dental Hygiene Students .................................................. 49
- Employment Characteristics of Recent National Board Dental Hygiene Examination Candidates .......................... 94
- Improving Multiple Choice Examinations in an Undergraduate Dental Hygiene Program .................................. 101
- Incorporation of Service Learning into the Dental Hygiene Curriculum ............................................................... 150
- Mock Clinical Boards: Effective Board Preparation? .......................................................................................... 61
- National Survey of Dental Hygiene Programs Regarding Health Behavior Education ........................................ 134
- Nontraditional University Credit for Dental Hygiene Degree Completion Students ............................................ WIP21
- Second Phase of Clinical Integration of Dental and Dental Hygiene Students ......................................................... 56
- Therapeutic Communication Skills for Dental Hygiene Students ........................................................................ 68
- Validating the National Board Dental Hygiene Examination .................................................................................. 152
- Value of a National Board Dental Hygiene Review Course: A National Survey .................................................. 112
- Web-Based vs. Traditional Instruction in Gerontology for Dental Hygiene Curriculum ....................................... 54

**Alternative Medicine**
- Complementary and Alternative Medicine Awareness in Dentistry ................................................................. 15

**Amalgam**

**Anatomy**
- A Novel Three-Dimensional Multimedia Approach to Teaching the Pterygopalatine Fossa ........................................ 73
- Gateway to Dentistry: A Program to Expose Potential Applicants to Dental School and the Dental Profession ................................................................. 144
- Mind Mapping and Learning Anatomical Concepts .............................................................................................. 97
- Teaching Head and Neck Anatomy Using Reconstructive Modeling: Update ...................................................... 26
- The Gross Anatomy Professor’s Guide to Oral Local Anesthesia ........................................................................ WIP5
- The Use of a Computerized, Interactive Learning Tool in Dental Anatomy .......................................................... WIP3

**Anesthesia**
- The Gross Anatomy Professor’s Guide to Oral Local Anesthesia ........................................................................ WIP5

**Appointments**
- A Novel Approach to Scheduling New Patients in a General Practice Residency .................................................. 110

**Assessment**
- An Assessment of African American Dentists’ Career Satisfaction and Practice Location ........................................... 77
- Assessment of Personality Preferences via MBTI and Performance in Dental School and on Licensure Examinations ........................................................................ 72
- Assessment of Calibration of Dental Students for Grading ... 41
- Children’s Oral Health: Application of a Needs Assessment in a Rural and a Native American Community ............ 31
- Competency Assessment in Comprehensive Patient Care ...................................................................................... WIP23
- PBL Assessment Instruments Utilized in a Hybrid Curriculum: A Comparative Study .......................................... 147

Hygiene Students ................................................... 56
Skill Progression and Licensure Examination Preparation of
First Professional Students in the Discipline of Fixed
Prosthodontics ....................................................... 60
Student Perception of Dentoform Teeth Containing Simulated
Caries Lesions ......................................................... 67
Students’ Evaluation of a Preclinical Course in Periodontics
After One Year of Clinical Training ........................... 118
Usability of Practice Management Systems in Clinical
Dentistry ............................................................... WIP31
Using the Standardized Client to Practice Tobacco Cessation
Interventions ........................................................ WIP33
What Determines Student Perceptions of Extramural Clinical
Rotations? An Analysis Using ADEA Senior Survey
Data ................................................................. 66

Collaboration/Communication
A Patient-Instructor Module to Promote Cross-Cultural
Communication Skills .......................................... 70
Clinical Collaboration of Dental and Dental Hygiene
Students ............................................................. WIP10
Outcomes of Bite Splint Treatment: A Function of the Student
Provider’s Communication Skills? .......................... 132
Senior Professor Program ........................................ 139
Therapeutic Communication Skills for Dental Hygiene
Students ............................................................. 68

Community
Community-Based Comprehensive Care Dental Training
Program for Dental Students ................................. 157
Determining Access to Care Barriers at a Local Community
Center ............................................................... 151
Incorporation of Service Learning into the Dental Hygiene
Curriculum ............................................................ 150
Measuring Community-Based Dental Education Experience
of Predoctoral Students ......................................... 156
Project HEARTS: Humanitarian Efforts and Research of
Tomorrow’s Scientists ............................................. 123
Puerto Rico Infant Caries Prevention Program ............. 75

Competency
New Curriculum Influence on Acquiring Early Skills in
Intraoral Radiology ............................................... 93

Complementary Medicine
Complementary and Alternative Medicine Awareness in
Dentistry .............................................................. 15

Composite Restorations
Resource Utilization for Clinical Decisions Regarding
Posterior Composite Restorations .............................. 11

Comprehensive Care
A Vertically Integrated Comprehensive Care Clinical Teaching
Model: A Seven-Year Summary .................................. 122
Community-Based Comprehensive Care Dental Training
Program for Three-Year Trends in a New Clinical
Restorative Dentistry Program ................................... 84

Consultation
Evaluation of Medical Consultations for Dental School
Patients ............................................................... 124

CPR
Attitudes of Ohio Dentists and Dental Hygienists on the Use
of Automated External Defibrillators ........................ 149

Critical Thinking
Changes in Reflective Judgment During the First Year of the
Dental Clinical Curriculum ..................................... 136
Thinking Students’ Perception of Learning Utilizing a
Double-Entry Journal ............................................. 64

Curriculum
A Dental School Curriculum that Integrates Limited
Orthodontics Using a Clear Esthetic Appliance
System ............................................................... WIP24
A Periodontal Surgical Elective for Dental Students:
A Didactic, Hands-On, and Clinical Approach ......... WIP30
A Vertically Integrated Comprehensive Care Clinical
Teaching Model: A Seven-Year Summary ................. 122
Changes in Reflective Judgment During the First Year
of the Dental Clinical Curriculum ........................... 136
Classroom Instructional Practices at a U.S. Dental School .. 106
Community-Based Comprehensive Care Dental Training
Program for Dental Students .................................. 157
Curriculum Changes in Preclinical Laboratory Education
with Virtual Reality-Based Technology Training ....... 154
Dental Hygiene Students’ Preferences for Using
Blackboard ........................................................... 29
Development of Guidelines for Teaching Women’s Health
in Dental Schools .................................................. WIP24
Evaluation of a Novel Dental Course Redesign Project .... 71
Faculty and Student Use of the VitalBook DVD at
NYUCD ............................................................. 79
First-Professional Students’ Perception of Clinical
Preparedness: Impetus for Curricular Change ............. 109
Generalist Model Cross Training .............................. WIP18
Improved Treatment Planning Teaching Materials Through
Personal Publishing ................................................. 83
International Outreach Programs, Phase II: Charity,
Education, or Both? .............................................. WIP25
