Note that numbers refer to poster number, not page number. WIP refers to Works in Progress, which are not numbered.

**Admissions**
- Assessment of Female and Minority Dental School Application and Enrollment at UNLV-SDM ........................................... 8
- The Color of Dentistry: Trends in Student Enrollment and Retention in Kentucky ..................................................... 28
- Correlation of Admissions Criteria with Academic Performance in Dental Students .............................................. 45
- Correlation of a Carving Test and the First Year of Dental School GPA to Graduating Class Rank and Graduating GPA .............................................................................................................. 67
- Correlation of the Entering GPA, DAT, PMAT, and Carving Test to Graduating Class Rank and GPA .................. 63
- The Establishment of a Predental Society and Its Impact on the Dental Applicant Pool .......................................... 6

**Allied Dental Education**
- Admission Indicators of Failure on the National Board Dental Hygiene Examination ........................................ 43
- Assessing Critical Thinking in a Dental Hygiene Curriculum ................................................................................. 91
- Changing Attitudes Among Dental Hygiene Students About Elementary School Dental Health Education ............ 80
- Comparison of Millennial and Nonmillennial Dental Hygiene Student and Faculty Classroom Expectations .. 90
- Correlation Between OSCEs and Dental Hygiene Clinic Grades .............................................................................. 40
- Dental Hygiene Faculty and Student Perceptions of Clinical Skills: Investigating the Millennial Learner’s Ability to Self-Assess ........................................................................................................... WIP
- Dental Hygiene Faculty Calibration ......................................................... 132
- Dental Hygiene Students’ Personal Style and Preference for Online vs. Lecture Courses .................................. 60
- E-Learning in an Entry-Level Baccalaureate Dental Hygiene Program: Students’ Perspectives ...................... 72
- Evaluation of an Online Dental Hygiene Research Course ....................................................................................... 82
- Impact of Cultural Competence Instruction in a Dental Hygiene Program, Year 2 .............................................. 85
- Livestream Video: An Emerging Technology to Model Patient Education for the Dental Hygiene Student ...... 107
- The Millennial Student and Attaining Competency ................................................................................................. 128
- Missing Persons: African Americans in Dental Hygiene ...... 55
- Multicultural Sensitivity of Dental Hygiene Students: A Longitudinal Study ......................................................... 68
- Muscle Activity Comparisons in Dental Hygiene Students When Using Different Fulcroms While Scaling .... 75
- Patient Satisfaction in a Restorative Functions Dental Hygiene Clinic ................................................................. 27
- Personal Styles of Graduates of a Dental Hygiene Program ..................................................................................... 86
- Pilot Exam Use as Predictor for the National Board Dental Hygiene Examination .............................................. 32
- Pilot Study: Learning Techniques for Local Anesthesia in a Virtual World ......................................................... 78
- The Prevalence of Academic Dishonesty in Texas Dental Hygiene Programs ....................................................... 51
- Promoting Good Fit of Career Choice in Dental Hygiene ......................................................................................... 49
- Reducing Anxiety and Improving Dental Hygiene Student Outcomes in Local Anesthesia ................................ 117
- Small Course, Big Change: How a Hybrid Dental Hygiene Course Stimulated Curriculum Change at a Health Science Center ................................................................. 123

Using the Index of Learning Styles to Identify Learning Style Preferences in Dental Hygiene Students ................... 79

**Anesthesia**
- Pilot Study: Learning Techniques for Local Anesthesia in a Virtual World ............................................................... 78
- Reducing Anxiety and Improving Dental Hygiene Student Outcomes in Local Anesthesia .................................. 117

**Assessment and Self-Assessment**
- Clinic Readiness Assessment of Preclinical Students .......... 77
- Correlation Between OSCEs and Dental Hygiene Clinic Grades ........................................................................... 40
- Gender Differences in Self-Assessment of a Carving Test to Graduating Class Rank and GPA ......................... 39
- Portfolio Presentations: Part of Competency Evaluation ......................................................................................... 105
- Prosthodontic Quality Control Assessment: Two-Year Data .................................................................................. 36
- Seeking the Ideal Examination Methodology: The Need for Multiple-Version Testing ...................................... 126
- Self-Assessment of Preclinical Examinations by Dental Students ........................................................................ 46

**Audience Response Technology**
- An Assessment of Interactive Learning Using the TurningPoint Audience Response System .................................. 34
- Comparison of Student Performance for Conventional vs. Interactive (ARS) Lectures ........................................ 3

**Board Exams**
- Comparison of Clinical Restorative Production to State Board Pass Rate ........................................................... 81
- Examining the Benefits of a National Boards Part I Comprehensive Review Course ........................................... WIP
- Examining Test Performance on the Comprehensive Part I of the National Board Dental Examination .......... 84
- Part II of the National Board Dental Examination: A Validity Study ........................................................................ 37
- Preparation Height and Convergence on Mock and Licensing Examinations .................................................... 92
- Taking the Road Less Traveled: Student Survey of NBDE Part I Board Preparation ............................................. 17
- Use of Mock Clinical Board Exams and Remediation to Improve Regional Board Exam Performance .......... 35

**Clinic Administration**
- Attitudes Towards Patient Safety Standards in U.S. Dental Schools ......................................................................... 47
- Documentation of Oral/Systemic Disease Associations in Dental School Patient Charts ....................................... 11
- Effects of Delayed Scanning and Storage Lighting on Soredex PSPs ................................................................... 16
- Patient Preference Regarding Dentist Selection ........................................................................................................ 13
- Prosthodontic Quality Control Assessment: Two-Year Data ................................................................................. 36
- Self-Reporting of Significant Clinical Errors by Undergraduate Dental Students .................................................. 59

**Clinical Education**
- An Authentic Approach to Evidence-Based Teaching and Learning ................................................................. 83
- Clinic Readiness Assessment of Preclinical Students ............................................................................................... 77
Dental Hygiene Faculty and Student Perceptions of Clinical Skills: Investigating the Millennial Learner’s Ability to Self-Assess .......................................................... WIP
Diagnosis and Treatment Planning Simulations Facilitate Students’ Transition into the Clinic? ............................. 48
The Effect of a Modified Clinic Teaching Model on the Fixed Prosthetic Refabrication Rate ................................ 58
Evaluation of Students’ Perceptions of an Integrated Cariology Course .................................................. 129
A Faculty Guide to Mentoring and CMS Utilization .......... 100
Implementation of a New Fourth-Year Clinical Curriculum ................................................................. WIP
A Student Guide to Mentoring and CMS Utilization .......... 99
The University of Minnesota Competency-Based Operative Dentistry Clinical Training System ..................... 108

Cognitive Task Analysis
Cognitive Task Analysis of Clinicians’ Decision-Making Activities During Diagnosis and Treatment Planning ........................................................................................................... 62

College/Undergraduate Students
Bring ‘Em Young! Instilling an Early Interest in Academia ........................................................................ 101
A Dental School Simulation Course: Changing Perceptions and Teaching Dentistry .................................. 20
The Establishment of a Predental Society and Its Impact on the Dental Applicant Pool ................................. 6
Measuring the Magnitude of Health Career Pipeline Leakage ......................................................................... 56
Predental Students’ Perceptions of a Career in Dentistry ..... 5

Community Education and Service
An Effective Offsite Model for Predoctoral Pediatric Dentistry Education ..................................................... 125
Influence of Community Outreach Experiences on Student Intent to Treat Underserved Populations ............. 134
Oral Health Promotion at the New Jersey Dental School .... 133
Prosthodontic Residency Community Outreach Initiative .... 97

Craniofacial Development
The Role of Prdm1 and Hand2 in Craniofacial Development .. 2

Critical Thinking
Critical Thinking: Assessing Skill Development by First-Year Dental Students ............................................. WIP
New Program for Critical Thinking in a Dental Materials Course .................................................................... 111

Cultural Climate in Dental Schools
Building Community in Times of Diversity: Orientation Session I ............................................................ 120
Dental Faculty, Staff, and Students’ Experiences with Diversity: A Comparison of the 1994–95 and 2006–07 Results of a Cultural Audit ......................................................... 26
LGBT Issues in Dental School Environments: Student Leaders’ Perceptions of Educational Efforts and Climate ......................................................................................... 18

Culturally Competent Oral Health Care
Impact of Cultural Competence Instruction in a Dental Hygiene Program, Year 2 ........................................... 85
Integrated Cultural Competence Curriculum in Dental Education ........................................................................ 61
Treating Diverse Patients: Orientation Session II .......... 122

Curriculum
Eating Disorders in the Oral Health Curriculum ............. 87
Evaluating Curriculum Integration at the UNLV School of Dental Medicine .................................................... 71
Faculty Perceptions of Course Structure on Program Goals . 43
Infusing Elder Abuse and Neglect Content into the Existing D.D.S. Curriculum ........................................... 135

Dental Anatomy and Occlusion
Using Composites to Form Posterior Anatomy in a Freshman Course ......................................................... 110

Dental Radiation
Patients’ Risk Perceptions Concerning Dental Radiation .. 53

Dental Records
Content Review of Dental Records: A Pilot Study ........ 54

Domestic Violence
Domestic Violence: A New Device to Train and Teach the Dental Applicant Pool ........................................... WIP
What Victims of Domestic Violence Need from the Dental Profession ......................................................... 33

Educational Methodologies (see also Educational Technologies, Online Educational Tools, and Problem-Based Learning)
The ACEs Program: Innovation in Experiential Learning . 98
Development of Individualized Learning Plans for General Practice Residents ............................................. WIP
Instructional Methods and Settings: Correlating Expected Outcomes of Dental Students and Faculty .......... WIP
Optimizing Course Design for the Millennial Learner ........ 19
Students’ Perceptions of Small Group Learning in a D.M.D. Curriculum ..................................................... 9
Teaching Case Presentation Skills to Dental Students: An Innovative Approach ........................................... 121

Educational Technologies
Curriculum DVD Usage Beyond the Predoctoral Program: Results from a Three-Year Follow-Up Survey .......... 69
E-Learning in an Entry-Level Baccalaureate Dental Hygiene Program: Students’ Perspectives ....................... 72
The Influence of Technology on Reflective Learning ........ 38
Using CAD/CAM Technology in the Simulation Laboratory for the Predoctoral Student ................................ WIP

Esthetics in Dentistry
Comparison of Student and Older Patient Preferences for Tooth Characteristics ........................................... 10
Esthetics and Orthodontics: Breaking Through Discipline Boundaries ....................................................... 106
Quality Assurance: Evaluating a Dental Laboratory .......... 109
New Ethical and Legal Issues Regarding Esthetic Treatment Planning ......................................................... WIP
The Toothguide Training Box: A New Device to Train and Test the Ability of Tooth Shade Differentiation ........ 113

Ethics
The Impact of a Professional Ethics Course on Professional Role Concept and Ethical Reasoning .................. 73
New Ethical and Legal Issues Regarding Esthetic Treatment Planning ................................................. WIP
The Prevalence of Academic Dishonesty in Texas Dental Hygiene Programs ........................................ 51
Students’ Personal Code of Ethics in Dental School and as Future Practitioners ........................................ 42
Evidence-Based Dentistry
An Authentic Approach to Evidence-Based Teaching and Learning .......................................................... 83
The Integration of Evidence-Based Dentistry and Critically Appraised Problems into the Patient Care Process .................................................. 130
Faculty Development and Recruitment
Assessing Faculty Members’ Satisfaction with Their Work Environment and Career Development.................. 104
Biodontics: An Educational Program to Introduce Practice-Based Research to Promote Dental Academic Careers .................................................................................. 118
Bring ‘Em Young! Instilling an Early Interest in Academia ................................................................. 101
Dental Hygiene Faculty Calibration ........................................................................................................ 132
Designing Promotion and Tenure Guidelines to Meet the Needs of Clinical Faculty for the Twenty-First Century ........................................................................................................ 131
Faculty Experiences in a Professional Development Seminar ........................................................................ 23
A Faculty Guide to Mentoring and CMS Utilization .................................................................................. 100
Faculty Perceptions of Classroom Civility ............................................................................................... 74
How Are Attributes of Academic Dentistry Portrayed in Websites of Pediatric Dentistry Residency Programs?...57
Standardization and Calibration of Faculty in a Course Featuring the Invisalign System............................... 31
Teaching Effectiveness: Utilizing the IDEA System .................................................................................. 102
Who’s Teaching Undergraduate Prosthodontics in U.S. Dental Schools in 2007? ........................................ 70
Female Dentists’ Career Paths
Career Paths of Marquette University School of Dentistry Female Graduates .............................................. WIP
Geriatric Dentistry
Impact of Geriatric Education on Student Attitudes and Elderly Patient Care ........................................... 25
Infusing Elder Abuse and Neglect Content into the Existing D.D.S. Curriculum ........................................ 135
Grade Inflation
Grade Inflation in Dental Schools: Does It Exist? .................................................................................. 89
Head and Neck Squamous Cell Carcinoma
NFKB Signaling in Head and Neck Squamous Cell Carcinoma ................................................................. 1
International Dental Education
Determining Outcome Success of Students Completing the International Dentist Degree Program at the University of Manitoba ................................................................. 103
Learning Styles and Computer Comfort of Thirteen International Dental Schools .................................. 50
Occupational Values Education for Dental Students and Pre-Service Secondary Teachers in Korea ............ 88
Overview of Dental Education Systems in Malaysia, Thailand, Japan, and the United States .................. 39
Planning and Implementation of a New International Dentist Education Program .................................. 114
Interprofessional Education
Interprofessional Education for Collaborative Patient-Centered Practice: A Manitoba, Canada, Initiative ...... 29
A Unique Collaboration with Nurse Practitioners .................................................................................. 112
LGBT Issues
LGBT Issues in Dental School Environments: Student Leaders’ Perceptions of Educational Efforts and Climate ........................................................................................................ 18
Motivational Interviewing
Teaching Dental Students Motivational Interviewing ......................................................................... 24
National Board Exams (see Board Exams)
Online Educational Tools
A Comparison of Learning Outcomes of Traditional Teaching Versus Self-Directed Learning via Technology ........................................................................ 65
Dental Hygiene Students’ Personal Style and Preference for Online vs. Lecture Courses ....................... 60
Developing a Prototype for a Web-Based Database for Dental Radiographs ........................................... 115
Differentiating Deep Enamel Lesions from Shallow Dentin Lesions Using Photographic Imaging ................. 116
Domestic Violence: An Interactive Website Tutorial ............................................................................. WIP
Evaluation of an Online Dental Hygiene Research Course ..................................................................... WIP
The Image Annotation Tool in Oral Histology: Student Performance Outcomes After Three Years ............ 119
Implementation of Online Clinical Learning Journals in a Comprehensive Care Curriculum .................. WIP
Livestream Video: An Emerging Technology to Model Patient Education for the Dental Hygiene Student .......... 107
A Need for Speed: Student Use of Recorded vs Live Lectures .................................................................. 12
Small Course, Big Change: How a Hybrid Dental Hygiene Course Stimulated Curriculum Change at a Health Science Center .................................................. 123
Oral Cancer Research
HPV Types 18 and 16 May Modulate Oral Squamous Cell Carcinoma Proliferative Phenotypes in Vitro ........ WIP
Orthodontics
Esthetics and Orthodontics: Breaking Through Discipline Boundaries ..................................................... 106
Standardization and Calibration of Faculty in a Course Featuring the Invisalign System .............................. 31
Pediatric Dentistry
Comparison of Four Different Sedation Techniques for the Pediatric Dental Patient .................................. 15
An Effective Offsite Model for Predoctoral Pediatric Dentistry Education ............................................. 125
How Are Attributes of Academic Dentistry Portrayed in Websites of Pediatric Dentistry Residency Programs?...57
Prediction of Behavior During Oral Conscious Sedation in the Pediatric Dental Patient ......................... WIP
Periodontics
Comparison of Methods of Oral Hygiene Instruction and Manual vs. Powered Brushing in Improving Gingival Health.......................................................WIP
General Dentists’ Referrals of Patients with Periodontal Disease: The Role of Dental Education.................................7
Making Decisions About Periodontal Treatment: Do General Dentists and Dental Students Differ?..........................4
Periodontal Competency Evaluation: Is It Working?..................93

Problem-Based Learning
Problem-Based Learning and SP Encounters: Translating PBL Learning Objectives to Clinical Interviewing Practices..................................................WIP

Prosthodontics
Application of a PDI System for Edentulism .......................124
Effect of Dental Students as Instructors on Preclinical Performance in Prosthodontics.................................41
The Effect of a Modified Clinic Teaching Model on the Fixed Prosthetic Refabrication Rate.......................................................58
Portfolio Presentations: Part of Competency Evaluation........105
Prosthodontic Quality Control Assessment: Two-Year Data...36
Prosthodontic Residency Community Outreach Initiative ....97
Who’s Teaching Undergraduate Prosthodontics in U.S. Dental Schools in 2007?....................................................70

Public Health and Dentistry
Changing Attitudes Among Dental Hygiene Students About Elementary School Dental Health Education.............80
Developing the Head Start Oral Health Initiative...............WIP
Developing and Implementing an Oral Health Literacy Curriculum.....................................................................................66
Oral Health Promotion at the New Jersey Dental School ....133
Protect Your Mouth: A Fifth-Grade Oral Health Curriculum..........................................................................................WIP

Published Articles
Looking at Ourselves in the Mirror: A Qualitative Analysis of Published Articles in the JDE in 1987 and 2007........95

Special Needs Patients
Arizona School of Dentistry and Oral Health Special Care Dentistry Program.......................................................21
Effects of Lecture and Experience on Dental Students’ Attitudes Towards Patients with Special Needs .............14
Interdisciplinary Approach to Training Dental Residents in Developmental Disabilities ........................................WIP
Survey of Illinois Dentists Regarding Patients with Developmental Disabilities ...........................................52
A Transition Model for Special Care Dentistry .................WIP

Storage of Digital Images
Developing a Prototype for a Web-Based Database for Dental Radiographs..............................................................115
Effects of Delayed Scanning and Storage Lighting on Soredex PSPs.................................................................16

Students (Dental and Allied Dental)
Alcohol and Controlled Substance Use by Dental Students...30
Comparison of Millennial and Nonmillennial Dental Hygiene Student and Faculty Classroom Expectations..........90
Dental Hygiene Students’ Personal Style and Preference for Online vs. Lecture Courses..............................60
A Dental School Simulation Course: Changing Perceptions and Teaching Dentistry......................................................20
Dental Student Gambling Experiences: A Survey of Attitudes and Impact.................................................................94
Dental Students’ Personality Types and the Vertical Team Concept..................................................................................WIP
Determining Outcome Success of Students Completing the International Dentist Degree Program at the University of Manitoba........................................103
Educational Efforts and Climate......................................................18
Effect of Dental Students as Instructors on Preclinical Performance in Prosthodontics.........................................41
A Measure of Student Professionalism as a Predictor of Performance in Dental School.............................................96
Multicultural Sensitivity of Dental Hygiene Students: A Longitudinal Study.................................................................68
Peer Teaching/Peer Learning......................................................76
Students’ Perceptions of Classroom Incivilities.....................22
Students’ Personal Code of Ethics in Dental School and as Future Practitioners............................................................42
Taking the Road Less Traveled: Student Survey of NBDE Part I Board Preparation..................................................17
Time Management Methods Utilized by Dental Hygiene Students..................................................................................WIP
Using the Index of Learning Styles to Identify Learning Style Preferences in Dental Hygiene Students............79

Underrepresented Minorities and Pipeline Issues
Assessment of Female and Minority Dental School Application and Enrollment at UNLV-SDM..........................8
The Color of Dentistry: Trends in Student Enrollment and Retention in Kentucky.........................................................28
Measuring the Magnitude of Health Career Pipeline Leakage.....................................................................................56
Missing Persons: African Americans in Dental Hygiene.......55
Translating Research to Youth Through Information Technology: A Novel Avenue into the Dental Pipeline.................................127
