## Poster Abstracts: Subject Index

Note that many poster abstracts appear in more than one subject category in this index.

### Assessment
- Assessment of Critical Thinking Using Item Response Theory Modeling .............................................. PO-113
- Comparing Student and Faculty Assessments Using Computer-Assisted Evaluation Software .................. PO-146
- Comparison of Dental Board Examinations for the U.S. and Japan ......................................................... PO-147
- Course Evaluations: Dental and Dental Hygiene Students’ and Faculty Members’ Perspectives ................. PO-002
- The Customized Lesson Plan As a Self-Assessment/Reflection Tool ....................................................... PO-055
- Dental Students’ Self-Evaluation in Preclinical Operative Dental Procedures ........................................ PO-120
- Effective Case Writing in an Integrated Testing Format ................................................................. PO-071
- Effectiveness of Lecture Capture in Preparation for the NBDE ............................................................ PO-118
- How Does Student Self-Evaluation Compare with 360 Degree Faculty Evaluation? ............................... PO-067
- How Much Time Do Students Spend Answering Difficult Exam Questions? ........................................... PO-031
- Multisource Assessment and Feedback for Skill-Building in Caries Excavation ..................................... PO-053
- The PAT-Unlocking Potential for Expanded Interpretation and Use ....................................................... PO-052
- Predicting Students’ Clinical Performance Using Advanced Simulation ................................................ PO-125
- Self-Reflective, Faculty, and Digital Assessment of Dental Wax-Ups ...................................................... PO-107
- Student Self-Assessment Versus Faculty Evaluation of Operative Dentistry Practical Examinations .......... PO-001
- Test-Enhanced Learning and Demonstrations of Competence: A Three-Year Study ............................... PO-026
- Using Google Sites as a Comprehensive ePortfolio Solution .................................................................... PO-104
- Utilizing the Incentive of Peer Assessment to Maximize Clinical Proficiency ........................................ PO-065
- Validation of Evidence-Based Dentistry and Critical Thinking Application Assessment Tool ................ PO-047
- Why Distinguishing the Misinformed from the Uninformed Student Is Important .................................. PO-098

### Biomedical Sciences
- Correlation Between Undergraduate Advanced Science Courses and Dental Students’ Biomedical Sciences Performance .......................................................... PO-028
- Effect of Technology-Assisted Training on Students’ Dental Anatomy Waxing Performance ................ PO-084
- Integrating New Electronic Technologies in Dental Pathology Courses ............................................... PO-027
- Integration of Biomedical Foundations Through Clinical Cases in Online Modules ............................ PO-056
- Perceptions of DMD Student Readiness for Basic Science Courses: Can Online Review Modules Help?? PO-068
- Phospholipase A2 Mediated Hydrolysis of Bacterial Lipids in Osteoblast Cultures ................................ PO-025

### CAD/CAM
- Calibrating Faculty to Use High-Tech Digital Glazing Techniques for CAD/CAM .................................. PO-117
- Comparing Student and Faculty Assessments Using Computer-Assisted Evaluation Software .............. PO-146
- Igniting Calibrated Faculty to Unlock Student Potential with CAD/CAM ............................................. PO-046
- Use of CAD/CAM Technology to Help Students Reach Their Potential ................................................. PO-135

### Career Planning
- The Real World: How to Successfully Enter Today’s Workforce ............................................................ PO-066

### Cariology
- Caries Remaining in Cavity Preparations as Criteria for Dental Licensure Examinations ........................ PO-090
- Improving Teaching, Learning, and Assessment of Caries Diagnosis with SNODENT ............................ PO-119
- Multisource Assessment and Feedback for Skill-Building in Caries Excavation .................................... PO-053
- The Role of Online Learning Modules in Radiographic Caries Diagnosis Skill Improvement ................ PO-030

### Clinic Management (see also Communication)
- Analyzing the Prevalence of Hepatitis B in Asian American Patients ..................................................... PO-038
- Assessing Clinic Resources for Patients with Limited English Proficiency ........................................ PO-009
- Dental School Survey: Treating Patients with Limited English Proficiency ......................................... PO-022
- Do Cross-Training Faculty and Patient Scheduling Improve Clinical Efficiency? ................................. PO-032
- Lessons from Dental Patient Safety Case Reports .................................................................................. PO-029
- The Role of Assertional Knowledge in a Dental Diagnostic Terminology .............................................. PO-036

### Clinical Education (see also CAD/CAM and Communication)
- Assessing the Impact of “Infobutton” on the Speed and Accuracy of Determining Drug-Drug Interactions in a Dental Setting .............................................................. PO-014
- Assessing Prescrioption Writing: We Have Lit the Fire! PO-103
- Case Study Analyses of Dental Students’ Clinical Diagnostic Reasoning Process ................................ PO-122
- Changes in Predictive Models of Dental Students’ Feelings About Treating Underserved Populations ........ PO-081
- Comparing Two Teaching Methods: Virtual Patient Avatar versus Traditional Lecture ........................ PO-045
- Dental Students as Diabetic Lifestyle Educators .................................................................................... PO-097
- Dental Students’ Perspectives on Dental Hygiene Peer Teaching: An Exploration ............................... PO-132
- Dentists’ Experiences with Drug Diversion and Substance Use Disorders ............................................ PO-080
- Do Case-Based Patient Simulation Projects Help Two Years Later? ..................................................... PO-153
- The Effect of Processing and Learning Approaches on Diagnostic Accuracy in Novice Clinicians ........ PO-069
- Evaluating Impact of Retraction Method Taught in Local Anesthesia Delivery ..................................... PO-156
- Externalizing Clinical Thinking with Card-Based Role-Play .................................................................. PO-039
Poster Abstracts: Subject Index (cont.)

Integration of Biomedical Foundations Through Clinical Cases in Online Modules ..................................... PO-056
New Teaching Tool Aims to Improve Students’ Clinical Diagnosis of Oral Lesions .................................. PO-112
Non-Chairs, Conjoint Discipline Teaching Approach to Treatment Planning .................................. PO-058
The Patient Educator Presentation in Dental Education PO-108
Predictors of Students’ Clinical Performance ............... PO-008
Preparing for Inferior Alveolar Nerve Block Using an Injection Simulation Model .................................. PO-043
A Step-Wise Approach: Clinical Pharmacy Consult in a Dental Clinic ........................................... PO-073
Students’ Perspectives on Using Google Glass Recordings to Assess Clinical Skills with Standardized Patients PO-044
The Transition from Amalgam to Composite in U.S. Dental Schools ................................................. PO-139
Utilizing the Incentive of Peer Assessment to Maximize Clinical Proficiency ........................................ PO-065
Variation of Ergonomic Performance and Type of Student Dental Procedure .................................. PO-051

Communication
Assessing Clinic Resources for Patients with Limited English Proficiency ...................................... PO-009
Dental Student Focus Groups Inform Health Literacy Curriculum Development .................................. PO-072
Integrating a Patient Relations Liaison into the Interprofessional Skills Curriculum .......................... PO-106
Interprofessional Faculty Development: Train the Trainer for Patient-Centered Communication .......... PO-138

Community-Based Dental Education
Interdisciplinary Education Model Using the Gateway Program to Increase Dental Care Access .... PO-035
Student Initiative for Student-Run Program for Community Clinics and Interprofessional Activities .... PO-048

Critical Thinking
Assessing Critical Thinking in an Introduction to Clinical Dentistry Course ....................................... PO-088
Assessment of Critical Thinking Using Item Response Theory Modeling ........................................... PO-113
Long-Lasting Learning of Critical Thinking Skills in a Dental Curriculum ........................................ PO-011
Validation of Evidence-Based Dentistry and Critical Thinking Application Assessment Tool ........ PO-047

Curriculum and Institutional Evaluation
Dental Curriculum Evaluation and Management: Survey of ADEA Member Schools ....................... PO-140
TUSDM Diversity Engagement Survey: An Institutional Assessment of Diversity and Inclusion ........ PO-152

Dental Hygiene Education
An Assessment of Mass Fatality Preparedness in Dental Hygiene Education ................................ PO-015
Dental Hygiene Fast Track Option: Model for Recruitment and Retention ........................................ PO-116
Dental Students’ Perspectives on Dental Hygiene Peer Teaching: An Exploration ................................ PO-132
Developing an Accessible Bachelor of Science in Dental Hygiene .................................................... PO-128
Educatibg Health Professions Students to Work Inter-professionally Using Emerging Technologies PO-114
Enhanced Learning During the Dental Hygiene Process of Care .................................................. PO-059
Head and Neck Examinations: Knowledge Is Not Enough ................................................................... PO-100
Improving Student Clinical Success with the Use of Emotional Intelligence ................................ PO-143
Interactions Between Dental Hygiene Faculty and Undergraduate Students on Facebook ................. PO-012
Interprofessional Clinical Collaboration Conference: Dental and Dental Hygiene Student Perspective PO-110
IPE-Related Activities in U.S. Dental Hygiene Programs: A National Survey ................................ PO-075
Students’ Perceptions of Teaching Methodologies That Bridge Theory to Practice .......................... PO-003
Ten-Year Changes Reported in the ADA Survey of Dental Hygiene Programs ................................ PO-150

Dental Licensure
Care in Remaining in Cavity Preparations as Criteria for Dental Licensure Examinations ................ PO-090

Dental School Admissions (see also Pre-Dental School Programs and Underrepresented Minority Students)
Dental School Admissions: The Tools We Have and What’s Missing ................................................ PO-078
Evaluation of Admissions Criteria to Health Colleges at King Saud University ............................ PO-093
Holistic Admissions Success Stories ............................................................................................. PO-089
Quantitative Admissions Criteria as Predictors of Academic Failure at TUSDM ......................... PO-020
Sports, Music, and Art Related to Dental Psychomotor Skills ....................................................... PO-141
Structural Equation Model of Predictors of Dental School Performance ..................................... PO-134

Dental Students
Dental Students’ Perspectives on Professionalism in Dentistry ....................................................... PO-042
DEPA: Dental Education Pathway Analysis .................................................................................... PO-010
Engaging in Volunteerism: What Motivates Students? .............................................................. PO-076
Enriching First-Year Student Research Experience: A Newly Designed Toolkit Course ................. PO-151
Survey of Future Career Plans of Graduating Alberta Dental Students ........................................ PO-041
Using True Colors Personality Test in a Population of Dental Students ................................ PO-018

Diabetes
Dental Students as Diabetic Lifestyle Educators ................................................................. PO-097

Domestic Violence
Perceptions of the Dental Team’s Role in Domestic Violence Identification ................................ PO-095

Educational Methodologies
Analysis of Case-Based Learning in RPD Treatment Planning .................................................. PO-123
Electronic Health Record
Electronic Health Records: A Valuable Resource for Evaluating Methodology and Outcome for Regenerative Endodontic Procedures at Rutgers School of Dental Medicine.................................PO-061
Improving Teaching, Learning, and Assessment of Caries Diagnosis with SNODENT ................................PO-119

Emergency Training/Preparedness
An Assessment of Mass Fatality Preparedness in Dental Hygiene Education .................................................PO-015
A New Medical Emergencies Simulation for Dental Students: Program Development and Evaluation .....PO-124
Violence Intervention Awareness: Interprofessional Pilot Training for Health Professions Students ......PO-155

Endodontics
Electronic Health Records: A Valuable Resource for Evaluating Methodology and Outcome for Regenerative Endodontic Procedures at Rutgers School of Dental Medicine.................................PO-061

Ethics and Professionalism
A Model Course Redesign: Introduction to the Dental Profession .................................................................PO-086

Evidence-Based Dentistry
Evaluation of an Evidence-Based Pilot Course ..................PO-024
Patient-Centered Interactive Approach to Teaching Evidence-Based Best Practice ..........................PO-121
Validation of Evidence-Based Dentistry and Critical Thinking Application Assessment Tool ............PO-047

Faculty Development and Recruitment
Calibrating Faculty to Use High-Tech Digital Glazing Techniques for CAD/CAM..........................PO-117
Characteristics of Clinical Faculty Who Are Highly Rated by Students ..................................................PO-148
A Comparison of Academic and Practitioner Salaries in Selected Professions ..................................PO-129
Faculty Development: Unlocking Potential in Faculty, Residents, and Students .................................PO-109
Faculty Training Program: Transforming Practicing Dentists into Part-Time Faculty .........................PO-105
Igniting Calibrated Faculty to Unlock Student Potential with CAD/CAM .................................................PO-074
Interprofessional Faculty Development: Train the Trainer for Patient-Centered Communication ..........PO-138
The Junior Faculty Experience: Development of Teaching Skills .........................................................PO-013
A Pilot Study to Assess Calculus Detection Accuracy Among Periodontal Faculty Members ..................PO-083
Professional Development of Brazil’s Dental Faculty: PO-077 Qualities of an Effective Dental School Teacher: A Faculty Perspective .........................................................PO-019
Recruiting and Selecting Future Dental School Faculty ..............................................................................PO-087
The Rutgers Model for Recruiting, Training, and Retaining Dental Faculty ...........................................PO-094

Educational Technologies (see also CAD/CAM)
Assessing Prescription Writing: We Have Lit the Fire! ................................PO-103
Audience Response Systems and Active Learning: A Case Study ...............................................................PO-070
Benefits of Augmented Reality Simulation Used in Student Remediation .................................................PO-154
Can Virtual Patients Improve Competence in Decision Making in Gerodontology?............................PO-096
Comparing Two Teaching Methods: Virtual Patient Avatar versus Traditional Lecture ......................PO-045
A Continuing Professional Development Program in Gerodontology Using e-Learning ..................PO-079
Developing an Accessible Bachelor of Science in Dental Hygiene ..............................................................PO-128
Development of Gaming and e-Learning Platforms for Dental Education ..................................................PO-049
Do Case-Based Patient Simulation Projects Help Two Years Later? .........................................................PO-153
Educating Dental Students About Implant Surgery with Videotaped Educational Materials ..................PO-004
Effect of Technology-Assisted Training on Students’ Dental Anatomy Waxing Performance ..............PO-084
Effectiveness of Lecture Capture in Preparation for the NBDE .................................................................PO-118
Integrating New Electronic Technologies in Dental Pathology Courses ..................................................PO-027
Integration of Biomedical Foundations Through Clinical Cases in Online Modules ..........................PO-056
Interactions Between Dental Hygiene Faculty and Undergraduate Students on Facebook ..................PO-012
Live Lectures versus Online Recorded Lectures: A Survey Study ..............................................................PO-017
Perceptions of DMD Student Readiness for Basic Science Courses: Can Online Review Modules Help? PO-068
The Role of Online Learning Modules in Radiographic Caries Diagnosis Skill Improvement ............PO-030
Struggle Between Innovation and Evidence in Dental Education ..............................................................PO-085
Use of ANKI Software to Facilitate Oral and Maxillofacial Pathology Learning ..................................PO-046
Using Google Sites as a Comprehensive ePortfolio Software Solution .....................................................PO-104
Utilizing a Digital Response Program to Enhance Classroom Teaching ..................................................PO-149
Web-Based Interactive Instruction in Intraoral and Panoramic Radiographic Anatomy .......................PO-007

Poster Abstracts: Subject Index (cont.)
**Poster Abstracts: Subject Index (cont.)**

**Gerodontology**
- Can Virtual Patients Improve Competence in Decision Making in Gerodontology? ............................... PO-096
- A Continuing Professional Development Program in Gerodontology Using e-Learning .......................... PO-079
- An Exploration of Clinicians’ Attitudes and Practices Regarding Oral Health for Older Adults ............ PO-016

**Implant Education**
- Educating Dental Students About Implant Surgery with Videotaped Educational Materials .................. PO-004
- Predoctoral Implant Therapy Curricula Comparison: U.S. and Canadian Dental Schools ....................... PO-023

**Interprofessional and Intraprofessional Education**
- Educating Health Professions Students to Work Interprofessionally Using Emerging Technologies ...... PO-114
- A Health Fair Model: A Special Opportunity for Interprofessional Learning ........................................ PO-137
- Health Professions Program Readiness for Tobacco Dependence Treatment in Multidisciplinary Care .. PO-157
- Interdisciplinary Education Model Using the Gateway Program to Increase Dental Care Access .......... PO-035
- Interprofessional Collaboration Among Dental and Dental Hygiene Students ................................. PO-110
- Interprofessional Faculty Development: Train the Trainer for Patient-Centered Communication ............ PO-138
- Interprofessional Stroke Case Discussion for Pre-Health Students .................................................. PO-062
- IPE-Related Activities in U.S. Dental Hygiene Programs: A National Survey ..................................... PO-075

**Leadership Training**
- Make the Connection: University of Manitoba’s Oral-Systemic Health Day ........................................ PO-130
- A Pilot Dental Teamwork Course Focused on Interprofessional Competencies ................................... PO-144
- A Step-Wise Approach: Clinical Pharmacy Consult in a Dental Clinic ............................................... PO-073
- Student Initiative for Student-Run Program for Community Clinics and Interprofessional Activities ...... PO-048
- Student Perception of IPE Relevance in Didactic and Clinical Settings .............................................. PO-133

**Operative Dentistry**
- Students’ Perceived Learning Outcomes and Interprofessional Attitudes Towards Dental Care .......... PO-054
- Susie Sippy Cup: Tackling Early Childhood Caries Through Interdisciplinary Education .................... PO-060
- Teaching Oral Health to Physician Assistant Students ........................................................................ PO-006
- Violence Intervention Awareness: Interprofessional Pilot Training for Health Professions Students .. PO-155

**Oral and Maxillofacial Pathology**
- Use of ANKI Software to Facilitate Oral and Maxillofacial Pathology Learning ................................. PO-046

**Oral and Maxillofacial Radiology**
- Potential Effects of Disinfectants on PSP Plates in Dental Radiology ............................................... PO-037
- Web-Based Interactive Instruction in Intraoral and Panoramic Radiographic Anatomy .......................... PO-007

**Patients with Special Health Care Needs**
- Changes in Predictive Models of Dental Students’ Feelings About Treating Underserved Populations .... PO-081
- Educating Dental Health Professionals About People with Intellectual and Developmental Disabilities ...... PO-064

**Pediatric Dentistry**
- Dental Students in a Non-Dental Setting ........................................... PO-099
- The Impact of an Infant Oral Health Program in Dental Education .................................................. PO-101
- Susie Sippy Cup: Tackling Early Childhood Caries Through Interdisciplinary Education .................... PO-060
- The Transition from Amalgam to Composite in U.S. Dental Schools .............................................. PO-139

**Periodontics**
- A Pilot Study to Assess Calculus Detection Accuracy Among Periodontal Faculty Members ................ PO-083
- Relationship Among Estrogen, Estrogen Receptors, and Periodontal Disease in Adult Women ........... PO-050

**Pre-Dental School Programs**
- Academic Pre-Orientation for Incoming D1 Students: A Program Evaluation ....................................... PO-115
- Admissions Criteria for Success in a Credential-Enhancing Pre-Dental Master’s Program ................. PO-082
- College Students’ Perspectives on and Impact of a Dental Student-Directed Predental Program .......... PO-034
- A Comparative/Retrospective Study of Stony Brook Dental School’s DDS Summer Scholars Program .... PO-057
- Igniting an Interest in Dentistry by Exploring Its Science and Technology ........................................ PO-145
- Igniting the Pre-Dental School Candidate Mind: Learning Enhancement for Achievement in Dentistry (LEAD) 1, 2, 3 ................................................................. PO-131
- Interprofessional Stroke Case Discussion for Pre-Health Students .................................................. PO-062
- Pre-Dental School Handskills Development and Assessment: Teaching Honors Pilot Program .......... PO-033

**Prosthodontics**
- Analysis of Case-Based Learning in RPD Treatment Planning ......................................................... PO-123
- Do Case-Based Patient Simulation Projects Help Two Years Later? ................................................... PO-153

**Public Health Dentistry**
- Characteristics of DDS/DMD-MPH Programs at U.S. Dental Schools ........................................... PO-127
- Dental Central: Enhancing Student Engagement and Community Service at TUSDM ........................ PO-136
Poster Abstracts: Subject Index (cont.)

Service-Learning
Dental Central: Enhancing Student Engagement and Community Service at TUSDM .................. PO-136
Dental Students in a Non-Dental Setting .................. PO-099
Explore-Engage-Elevate: An Integrated Approach to Meaningful Global Service-Learning Programs ....PO-091
A Health Fair Model: A Special Opportunity for Interprofessional Learning .................. PO-137
Mission Mexico 2014: Evaluating a Dental Service-Learning Program ................................. PO-005

Substance Abuse
Dentists’ Experiences with Drug Diversion and Substance Use Disorders .......................... PO-080

Tobacco Cessation Education
Health Professions Program Readiness for Tobacco Dependence Treatment in Multidisciplinary Care ................................. PO-157

Underrepresented Minority Students (see also Pre-Dental School Programs)
TUSDM Diversity Engagement Survey: An Institutional Assessment of Diversity and Inclusion ........................ PO-152
Unlocking the Potential of the Dental Student Mind: Learning Enhancement for Achievement in Dentistry (LEAD) 4, 5, 6 ........................ PO-126
