

# Reviewer Thank You

In 2017, the *Journal of Dental Education* published a total of 128 original articles. The manuscripts of all of those articles (plus those ultimately rejected) had passed through the hands of peer reviewers who thoughtfully and conscientiously evaluate our many submissions, make recommendations to the editors, and guide authors in making revisions to strengthen their work. The journal's success in publishing research that meets the highest standards of quality and integrity depends on our reviewers, who represent a wide range of disciplines and come from across North America and around the world.

The peer reviewers' timely submission of reviews is critical to the fact that, in 2017, the average time from submission of a manuscript to first decision was 21.2 days and the average time from first submission to final decision was 33.5 days. In that year, we had a total of 667 original reviews conducted by 389 reviewers.

The editors are grateful to all the individuals who give their time, energy, and expertise to review submissions to the journal, and we are particularly grateful to those who review multiple manuscripts each year. Each year, we publicly thank those who have contributed reviews of two or more original manuscripts that year by publishing their names in the journal and on the journal's website.

The list below consists of those who reviewed two or more manuscripts of original submissions in 2017. Note that this count is based on number of original manuscripts, not on revised versions of the same manuscript. Thus, review of a single original manuscript counts as one review for the purposes of this list, even if a person reviewed that manuscript and its revised version/s two or more times.

We thank you all for your generous service to the *Journal of Dental Education*.
